

Last term, we enjoyed...

learning all about the Stone Age and how much human history has changed over the last several thousand years and we especially enjoyed learning all about the various pre-historic animals that inhabited the Earth at this amazing time. We really liked the Iron Man book and we wrote fantastic diary entries about him and his incredible story. We created some superb cave paintings and immersed ourselves in learning about the past on our Stone Age day. We loved learning about rocks and fossils as well as making our own mechanical monsters.

This term, we are looking forward to...

Learning about the earth! We are going to be focussing on all sorts of learning to do with our amazing planet. In Geography, we will be looking at the structure of the earth, its climate and the different biomes that make up it's surface and consolidating that learning in Science with a focus on plant growth and functions. In our D.T. lessons, we are looking at healthy foods and diet to create delicious healthy snacks and using some of the food we have grown in our allotments! In our other lessons, we will be furthering our understanding of computer coding by learning about conditional events to create more complex programs and furthering our knowledge of Spanish by learning about colours and numbers. We will continue our study of world religions with a focus on Sikhism as well as continuing to develop our Maths and English skills! In the second half of the term, we will look at the human body in Art, focus on Music from around the world and learn all about animal biology in Science- a busy term indeed!

Key Vocabulary

- Biome
- Climate
- Zone
- Carbohydrate
- Fat
- Protein
- Photosynthesis
- Pollination
