

Last term, we enjoyed...

This term, we have enjoyed learning about animals, especially when did our own research and made our own animal information books. We liked learning about Lancaster and we know lots of facts about the landmarks in Lancaster. Our favourite lesson this term was drawing and painting the matchstick people for our L.S. Lowry project. We also enjoyed designing and making our own Mars Rovers in our DT lessons. We were so proud of ourselves after our nativity, and we enjoyed going to see other actors perform when we went to see Puss in Boots at The Grand Theatre in Lancaster.

This term, we are looking forward to...

This term, we are very excited to be learning about what we need to do to keep our bodies healthy. We will be learning about multiplication, division and money as mathematicians. In RE, we will be learning about Hinduism and explore how Hindu people show their devotion to deities. We will also be making our own Diva lamps out of salt dough. In English, we will be reading some traditional tales with a twist. We have already discovered that the Big Bad Wolf is not as big and bad as we think! As artists, we will be learning how to draw a self-portrait like Pablo Picasso and how to print. We love learning and look forward to telling you all about it!

Key Vocabulary

offspring, reproduction, growth, child,
print, layer, perspective, position,
size, layer ink, materials,
portrait, arrange, squares, natural,
manmade Hinduism, deities, God,
